

HYGAIN
FEEDING CHAMPIONS SINCE 1983

Nutritional Supplements

Flexion® - Joint Supplement

A blend of quality nutraceuticals & glycosaminoglycan (GAG) components for the nourishment of joints, cartilage & connective tissues.

Pak-Cell® - B-Group, Iron & trace Mineral Supplement

A blend of quality B-Group vitamins, essential amino acids and bio-chelated minerals for use in horses diets where additional supplementation of these nutrients is desired.

RBO® - Equine Performance Oil®

A unique blend of pure rice bran oil, Vitamin E, Omega 3, 6 & 9 fatty acids and natural antioxidants formulated for all equines.

Recuperate® - Recovery paste

Rapid recovery aid providing an immediate supply of micro raw materials, energy, anti-oxidants and amino acids to promote an anabolic response to exercise in horses.

Regain® - Electrolytes

Formulated for horses to replace body salts lost during exercise, hot climatic conditions and as an aid in the treatment of dehydration, hypochloroemia and alkalosis.

Sporthorse® - Performance Horse Supplement

A multivitamin & trace mineral concentrate, for use in horses diets where additional supplementation of these nutrients may be beneficial.

Gleam®

Rapid Hoof & Coat Conditioner

A blend of biotin, bio-chelated zinc, quality amino acids, full fat soya bean meal and essential fatty acids formulated in a palatable banana flavoured base for all equines.

Product Features

- ✓ 20 mg Biotin per dose
- ✓ 200mg Bio-Chelated Zinc per dose
- ✓ 5000mg Methionine per dose
- ✓ Essential Amino Acids
- ✓ Available in 1.2kg, 6kg & 20kg

Active Constituents per 40 g Dose

Biotin.....	20 mg
Methionine.....	5000 mg
Zinc.....	200 mg
Full Fat Soybean Meal.....	34 g

Daily Dosage

Hoof & General Coat Conditioning.....	40 g
Rapid Coat Conditioning.....	60 g

Why feed HYGAIN® GLEAM®?

- ✓ For strong healthy hooves
- ✓ To assist horses with dull coats
- ✓ For show / sales preparation
- ✓ To assist in moving winter coats
- ✓ For general health and condition of horse coats, manes, tails and skin

Looking For That Dapple?

Skin and hair, the body's first line of defence against natural elements, are the most visible signs of a horse's overall condition.

All horse owners like to see their horses in full bloom with a healthy shiny coat. Research has found that horses supplemented with additional zinc, methionine and biotin have demonstrated superior fine hair growth. This in turn results in softer, finer hair, which we see as a glossy coat.

Omega essential fatty acids have also been known to have a positive effect on the coat and skin condition of the horse.

For the Coat

Try the 30 Day Rapid Coat Conditioning Test!

Whether for sale or show the end result is to stand out in the crowd in order to capture the buyers or judges attention. HYGAIN® GLEAM® provides specific nutrients to make your horse's coat bloom, resulting in a healthy skin and a rich silky lustre.

For the Hooves

HYGAIN® GLEAM® promotes the growth and development of healthy hooves, optimising horn and frog quality, hoof integrity and strength. Biotin, zinc and methionine supplementation is widely recommended by farriers and veterinarians.

Special Ingredients

HYGAIN® GLEAM® is a blend of quality ingredients, including Biotin, Zinc, Methionine and Omega Essential Fatty Acids in a palatable banana flavoured base.

Biotin - Biotin is a water soluble B-Group Vitamin often referred to as Vitamin H. A number of research trials have concluded that providing 20mg of biotin per day will result in significant improvements to hoof quality in a period between 6 and 12 months. Research also suggests that biotin stimulates the production of keratin, which in turn provides for the production of smooth soft hair in the coat.

Methionine - Methionine is an essential sulfur bearing amino acid which is required to be supplemented in the horse's diet, as horses are not able to produce this themselves. Nutritionists and veterinarians alike have been recommending methionine for years because of its ability to stimulate the production of keratin fibres in the horses' coat. Methionine works synergistically with biotin to increase the effectiveness of both nutrients.

Zinc - Zinc is associated with the health and integrity of hair, skin, hooves and the immune system. Zinc deficiencies retard the synthesis of DNA, RNA and protein, which are necessary for proper coat condition and repair. A shortage of zinc can also impair cellular division and growth and repair of connective tissues. HYGAIN® GLEAM® contains Bioplex® chelated zinc. The chelation process protects the minerals from oxidative reactions within the horse's stomach that may lead to other forms of minerals (oxides and sulphates) becoming less absorbable, or conflict with other nutrients. Therefore Bioplex® chelated zinc is a more efficient and absorbable method of supplementing this mineral.

Full Fat Soybean Meal - Is high in fat and easily digested by the horse and contains all the essential amino acids and essential fatty acids required for healthy skin and a glowing coat.
